Supply and Install *Padel Tennis Courts*

*Building courts for the fastest
growing sport in Europe...*

No.1 Suppliers
& Installers

Why Padel?

Padel Courts can be built in relatively small, unused areas, and can provide hours of fun for the whole community! Played by anyone, anywhere, in any weather, at any time of day, indoors or outdoors.

Accessibility: Padel is relatively easy to learn and can be played by people of all ages and skill levels. The smaller court size and lower net make it easier for beginners to hit the ball, and it's a great way to get exercise and improve hand-eye coordination.

Social aspect: Padel is a social sport that is best enjoyed with friends and family. It's a great way to spend quality time with loved ones, bond with colleagues, and meet new people.

Versatility: Padel can be played indoors or outdoors, and can be enjoyed in various weather conditions. This makes it a great all-year-round sport that can be played in different environments.

Exciting gameplay: Padel is a fast-paced, action-packed sport that requires quick reflexes and strategic thinking. With the smaller court and walls, players have to think creatively and react quickly to keep the ball in play, making every match an exciting challenge.

Health benefits: Padel is an excellent form of low-impact exercise that provides a full-body workout. It helps improve cardiovascular health, strengthens muscles, and reduces stress levels. Whether you're playing for fun or competing, padel is a great way to stay healthy and active.

Investing in a fully installed Padel court can give you returns of up to £130,000 per year, even if it's only at 90% capacity!

This means that you'll be making your return on investment in under a year! Our installation is both sturdy and enduring, requiring only minimal maintenance every 5 years. **With a lifespan exceeding 10 years**, you can count on many years of uninterrupted play ensuring that you are investing in a top-quality court that will serve you well for years to come.

Already have a tennis court? Nomow also offers a fantastic opportunity to **transform your underutilised tennis courts** into state-of-the-art padel courts. Take advantage and revitalise your service with an exciting new sport that's taking the Europe by storm!

Padel, a rapidly growing sport in Europe, remains untapped in the UK.

Don't miss out on the opportunity to capitalise on this thriving industry. Learn more using the QR code and invest today.

The flexibility of our manufacturing process allows us to create bespoke padel courts, tailored to fulfil every customer's needs and meet the demands of any location.

Professional

The Professional Court is our best-selling product, a balanced blend of innovation, technology and a manufacturing process that uses only the highest quality materials.

The glass panels of this court are only interrupted by corner posts, providing spectators with a great view of the game and giving players an even and unbroken surface with which to confound their opponents.

Venues often choose the professional Court for their 'centre court'; used for tournaments, exhibition matches and group coaching sessions.

Technical specifications

- 2mm pre-galvanised steel
- 12mm tempered glass
- Folded safety mesh
- Laser cut anchor plates

Competition

Our Competition court is an engineering marvel.

Built on the perimeter plate system, AFP's proprietary floating beam allows for the removal of all four corner pillars.

Without any optical obstructions standing between spectators and players, this court boasts true panoramic visibility.

Technical specifications

- 2mm pre-galvanised steel
- 12mm tempered glass
- Folded safety mesh
- Laser cut anchor plates
- Mobile support plates 8mm thick
- No ground anchorage & no corner pillars

Basic

Faithful to the roots of the sport and boasting unbeatable stability and attractive design, these courts deliver maximum return on investment in the long term.

Our aluminium posted court offers unrivalled corrosion resistance.

Should your location require a reinforced structure, we offer several fabrication options to increase the strength and durability of your court.

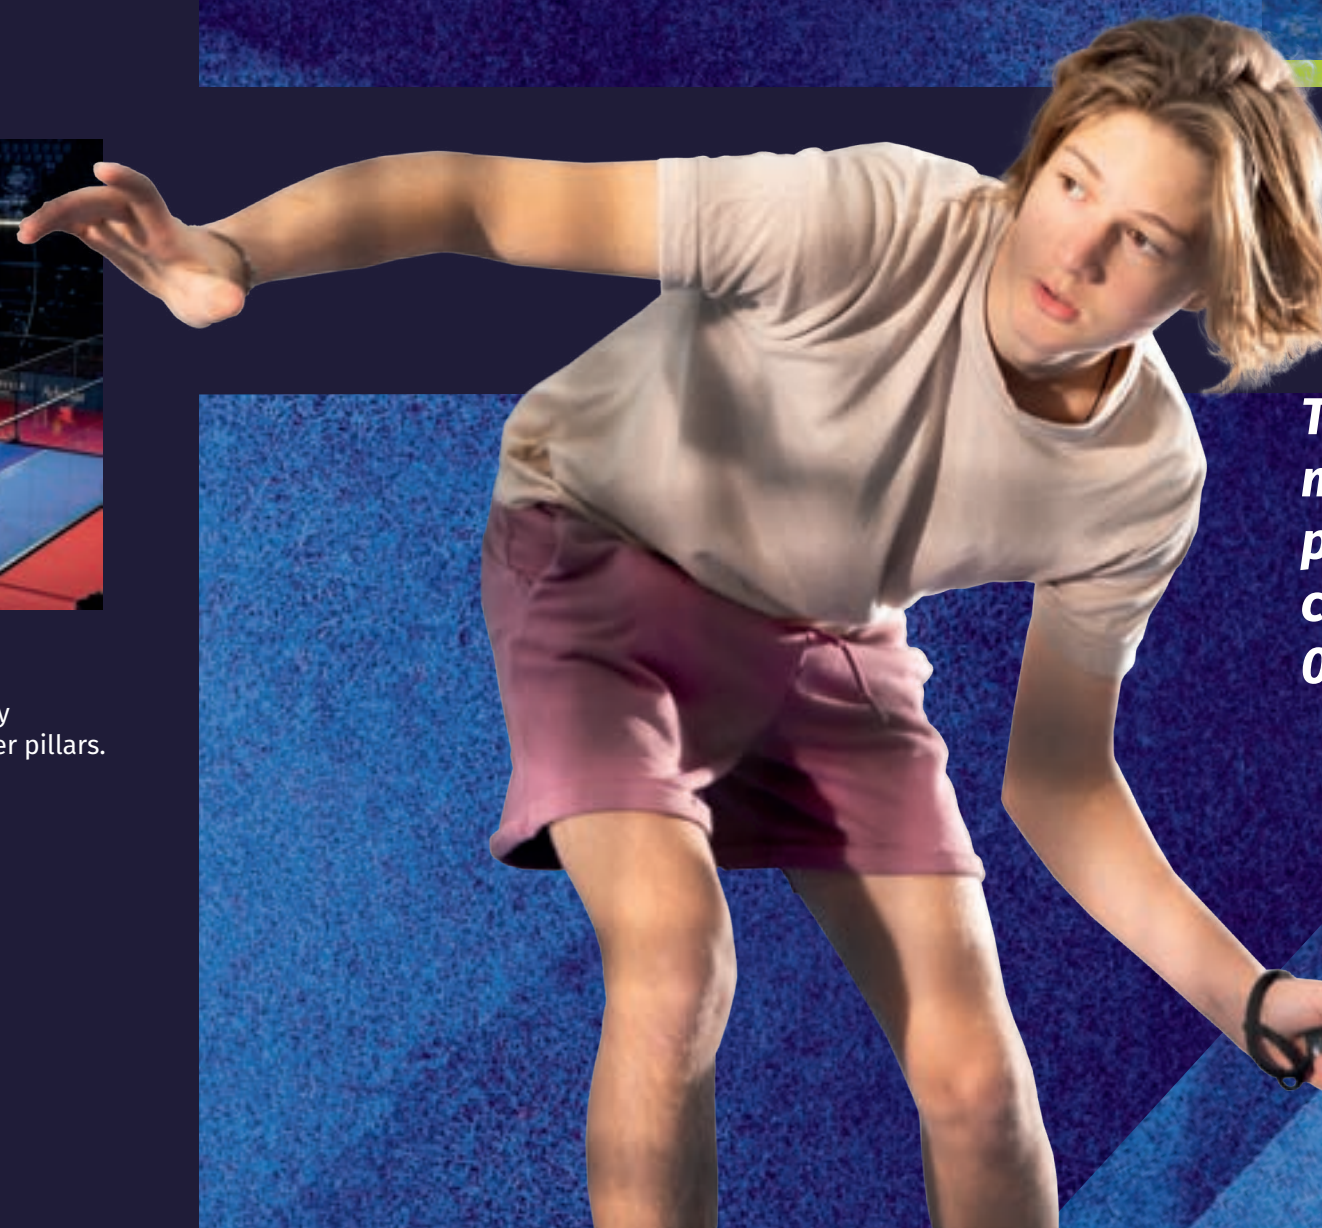

Technical specifications

- Minimum 2mm steel or aluminium thickness
- 10mm tempered glass
- Folded safety mesh
- Laser cut anchor plates

"The UK's leading artificial grass company..."

EXPERTS IN
SPORTS GRASS
INSTALLATIONS

IN-HOUSE
CONSTRUCTION
TEAM

Our Padel courts are designed for the standard size of 20m x 10m and include solid fencing or Perspex, lighting, and appropriate works for the surrounding areas.

The base is a concrete slab with the artificial grass installed on top. The line markings will be made from the same artificial grass and are installed by our expert installers with precision and will ensure a very high level of durability. Costs for constructing and maintaining Padel courts are lower than any other major sport!

Designed for Efficiency

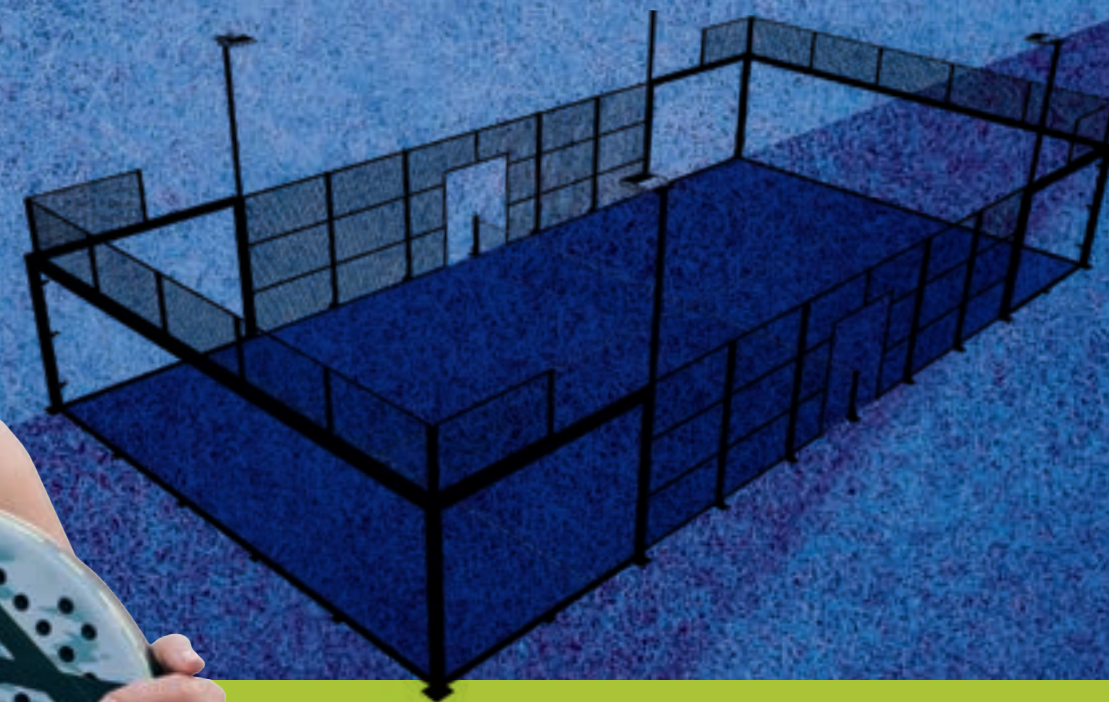

Padel courts use 50sqm per player. Tennis courts need 325sqm per player. This efficiency improvement can multiply hourly income rates by 6!
